

STRUCTURED RETURN-TO-WORK PROGRAM

Physician Information Sheet

Tuolumne JPA member school districts are making new efforts in safety, accident prevention, and in assisting our employees' return to work following disability injury/illness. Recently, we have refined our return-to-work efforts.

We have evaluated our municipal operations in every department and have found numerous temporary work assignments that are available to our injured employees. These assignments are meaningful, productive, and can be performed by our temporarily disabled employees.

Most of these temporary work assignments have minimal physical demands. We can provide medically appropriate temporary work assignments to accommodate most injuries. It is our goal to coordinate your patient's return to work by assignment of specific tasks in accordance with your work restrictions.

**Please complete the Work Status Report
Review the employee's regular job description (if provided).**
