

Educators!

Keep Pesticides Out of Your Classroom!

Instead, you can prevent a pest invasion:

1 Keep surfaces clean and dry

2 Use soapy water to clean up ant trails

3 Store food in tight-fitting containers

4 Reduce clutter, like cardboard boxes and old files

5 Make sure trash cans are emptied at the end of each day

If you notice evidence of pests, like an ant trail, notify your integrated pest management (IPM) coordinator:

name and phone number

California Department of Pesticide Regulation
