

MEMBER ALERT

(SB 1072) Child Safety Alert Systems in School Buses

Effective July 1, 2018, Vehicle Code 28160 requires school buses to be equipped with a Child Safety Alert System.

SB 1068 was introduced on February 12 seeking to amend this law to allow an extension postponing the requirement until July 1 2019. **As of the date of this publication, the law still effective July 1, 2018.**

The system would be located at the interior rear of the vehicle that requires the driver to either manually make contact or scan the device, thereby prompting the driver to inspect the entirety of the vehicle before exiting. For more information on this legislation please refer to the link below:
